To whom it may concern.

We are a Table Grape produce packer in the Hexriver Valley South Africa. We export to the UK, USA and Far East. We also supply Woolworths South Africa with a significant amount of grapes since 1994.

We only produce seedless grapes and we strive to have the best varieties available in the world and we strive to produce the best quality possible of this variety in as efficient and environmentally friendly way possible.

It is pointless to produce the best quality and then neglect the postharvest side of the business.

UTE and Miatech plays a large role in this. They assist us with Post Harvest Technology and knowledge. We have installed a number of their products to control humidity in our holding and packing facilities as well as Bio Turbo steri systems for the same facilities as well as in our dedicated reefer truck that we use to supply Woolworths.

With their assistance we have managed to deliver even better grapes. We have been able to increase our market share to all our preferred customers. This was directly attributable in supplying a fresher healthier and better looking product than our competition.

Regards,

Johan Kriegler
