

REFERENCE LETTER FOR BIO TURBO

Goodlife is one of the leading export and wholesale companies of fresh fruit in Viet Nam. And our target is that supplies for customers fruit with the best quality.

In order to deliver the best possible quality to our customers, one of our main concerns has always been to improve the storage conditions of our produce. To enhance the quality and shelf-life of fruits, we decided to install on BT 300 for one of our cold storages.

After using Miatech Bio Turbo System for our cold storage from last year, we can see the effective and get good result. Our fruits can be stored in longer time and fresher, especially those fruits which produce more ethylene gas in natural ripening process. This system is really helpful and works for our fresh fruit business.

On the other hand, we are really satisfied with your service. Really thank for your time in Vietnam to help us install the unit in 2016. After more six months of installing the first Miatech Bio Turbo, now we decide to buy more three units for our cold storages in Ho Chi Minh.

We recommend the Bio Turbo as a very valuable addition to cold storages for every fresh fruit company.

Thanks and Best Regards
